

Welcome Address

Dear Colleague

Since the birth of the field of interventional cardiology, we have witnessed its steady, prolific growth. Over the past three decades we have also witnessed its evolution, with improvements in technology, a decrease in complications, better immediate and sustained results, expanding indications and an ever-growing volume of procedures. In Egypt, the expansion of this field has run in parallel to the advances seen worldwide.

The 8th meeting of the Egyptian working group of interventional cardiology will take place at Kasr El Eini School of Medicine, Cairo University, the second oldest school of medicine worldwide, and the oldest and largest teaching university centre in Egypt.

The meeting will host a large number of Egyptian interventional cardiologists, from Alexandria on the Mediterranean, to Assiut in upper Egypt. It will also host colleagues from the Arab world countries and Europe.

The focus of this meeting will be on the current practice and future of interventional cardiology. We aim to spread the current knowledge and technology amongst the younger generations. We are now witnessing the emergence of new ideas and advances in different directions, some of which may reshape the future of interventional cardiology.

The meeting program features live case demonstrations, interactive sessions, panel discussions, and teaching sessions. The spectrum of discussions will include state of the art concepts and techniques of PCI, peripheral vascular interventions, carotid stenting, the use of IVUS, management of HCM, and pediatric interventions.

An outstanding international faculty will contribute to the performance of complex live procedures and the scientific discussion in panels, symposia and interactive sessions. We hope you will all enjoy a fruitful scientific event and spend a pleasant time with your colleagues and friends.

Files in Interventional Cardiology

More than 70 cardiologists from 10 centers have participated in the preparation of 20 specific topics (files) that cover important issues and problems commonly encountered in the practice of cardiovascular interventions.

The prepared files will be presented in the meeting during the live demonstration sessions. The twenty topics will be compiled in a **single CD** that will be distributed to all attendees of the meeting. These topics include:

- Bifurcation stenosis
- Long lesions
- Septal perforator ablation in HOCM
- Stenting the carotid artery
- Primary PCI for STEMI
- PCI in the post-CABG patient
- Direct stenting
- Management of stent-deployment complications
- Management of coronary artery perforation
- Iliofemoral angioplasty
- PCI in diabetic patients
- Adjunctive antithrombotic therapy in PCI
- Percutaneous mitral valvotomy
- Percutaneous ASD closure
- Management of no-reflow
- Drug-eluting stents
- PCI in thrombus-containing lesions
- Cutting balloon
- Chronic total occlusion
- Multivessel PCI

Cultural Theme

The meeting will reflect on the contributions of Arab civilization to Medicine.
The subject will be covered in a special talk on Thursday.

Social Events

Wednesday October 24: Special Ladies Program (by invitation)

Acknowledgment of Sponsors

The meeting directors and the organizing committee would like to acknowledge the contribution of the following companies:

- Minapharm
- Aventis pharma
- Astra Zeneca
- Servier
- Novartis
- Abbott Laboratories
- Sanofi
- Philips
- Servotec
- Egyptian Company for supplies
- Ghaliogy
